Platt's Lawn Grass Seed and Fertilizer

Platt's "Evergreen" Lawn Seed

... comes to you with a background of 76 years' experience and research in the making and maintenance of fine lawns.

Platt's Evergreen Contains:—

Kentucky Blue Grass—forms a good sod, is spreading, permanent, fine bladed, of beautiful color.

Creeping Red Fescue—thrives in sun or shade and in various soils, fine leaved, spreading tough sod, deep green color.

Highland Bent—beautiful green color, fine texture, makes dense turf.

Red Top—excellent special purpose nurse grass, makes quick turf, drought resistant. **Evergreen Lawn Mixture**—1 lb., \$1.60; 2 lbs., \$3.10; 5 lbs., \$7.50; 10 lbs., \$14.50; 25 lbs., \$33.00; 100 lbs., \$125.00.

Platt's "Shady Nook" Lawn Seed

... contains a high percentage of **Creeping Red Fescue**, the grass that tolerates shade, hard wear and adverse soil conditions, combined with other short fine grasses, such as **Kentucky Blue Grass** and **Red Top**.

It is difficult to grow grass in the shade and under trees because the trees use up nearly all the food and moisture in the soil. This mixture will thrive better than any other in the shade. Extra water and feeding will help to keep your grass going under trees.

Prices same as Evergreen above.

Platt's "Merion Blue Grass" Blend

... tested for years in 14 states and has the recommendation of the foremost turf experts in the United States. Spreads rapidly to form a handsome deep green, dense, compact, wear-resistant sod, thriving in various types of soils with a reasonable amount of moisture and plant food. **Merion Blue Grass** does not go dormant in summer, preventing to a large degree, crab grass infestations. Close and frequent mowings are not harmful. Seeding requirements are less than ordinary mixtures.

... we offer **Merion Blue Grass** either in a blend with other desirable compatible grasses or separately. Platt's "Merion Blue Grass" Blend contains 40% Merion Blue Grass, Creeping Red Fescue, Highland Bent and Red Top. New Seeding: 1 lb. covers approximately 700 square feet; re-seeding 1,000 square feet. 1 lb., \$2.50; 5 lbs., \$11.95; 10 lbs., \$22.50, postpaid.

Merion Blue Grass. This new wonder grass is low growing, needs less frequent mowing and thrives under close mowing. It forms a dense, well-knit, hardy, deep green turf, highly resistant to crabgrass, and of very fine texture. It resists disease and tolerates heat and drought. Although high priced it is economical as 1 lb. sows 700 sq. ft. 1 lb., \$4.90; 3 lbs., \$14.70; 10 lbs., \$48.00, postpaid.

Platt's "Edgewood Park" Grass Seed

... a splendid blend of selected grasses at a popular price. Contains desirable basic permanent grasses as **Creeping Red Fescue** and **Kentucky Blue Grass**, combined with nurse grasses. Is a quick growing semi-permanent mixture. Should be followed by reseeded with a more permanent mixture. 1 lb., \$1.10; 5 lbs., \$5.25; 25 lbs., \$25.00; 100 lbs., \$97.00.

Feed and Seed Your Lawn

To have a lasting green lawn be sure to replenish it each year with a light application of Lawn Seed and High Nitrogen Lawn Fertilizer.

Platt's "Special 10-5-5 Lawn Fertilizer"

All lawns should be fed at least once during the year (early spring) with a good, well balanced, lawn fertilizer, to produce a healthy, vigorous turf. (Two and three times for best maintenance.)

Platt's "Special 10-5-5 Lawn Fertilizer." Contains 10% Nitrogen, 5% Phosphoric Acid, and 5% Potash. Approximately 50% of the nitrogen is from organic sources, making the nitrogen more slowly available and lasting.

There is great economy in feeding your lawn with Platt's "Lawn Fertilizer." Apply only 10 pounds per 1,000 square feet for the early spring application with 5 pounds additional for application in late spring or early summer and a like amount in late August or early September. With this economy in mind, one can feed 1,000 square feet of lawn at a very moderate cost. 12½ lbs., \$100; 50 lbs. (covers 5000 square feet of established lawn), \$3.00; 80 lbs. (8,000 square feet), \$5.00; 6 bags (480 lbs.), \$29.00; ton (25 bags), \$96.00.

PLATT'S Lawn Seed...selected for greater "Come-Up-Ability"

SPRING 1955

ONCE again we take pleasure in presenting our revised catalog for your garden and pet supplies. To simplify this year's catalog we have omitted many of the less popular items. We hope you will feel free to ask us for anything you don't see here, and for any help we may be able to give you on gardening.

To replace some of the varieties we have dropped we have added several new flowers and vegetables. Many of them are the "All America" winners selected after rigid national performance trials. We recommend you to try these new items this year to keep abreast of the advances being made by American plant breeders. You will find the following varieties listed alphabetically in our catalog. This is their first year in any catalog:

Prima Donna Petunia—Toreador Cockscomb—McKana's Giant Columbine—Golden Beauty Sweet Corn—Pennsweet Muskmelon.

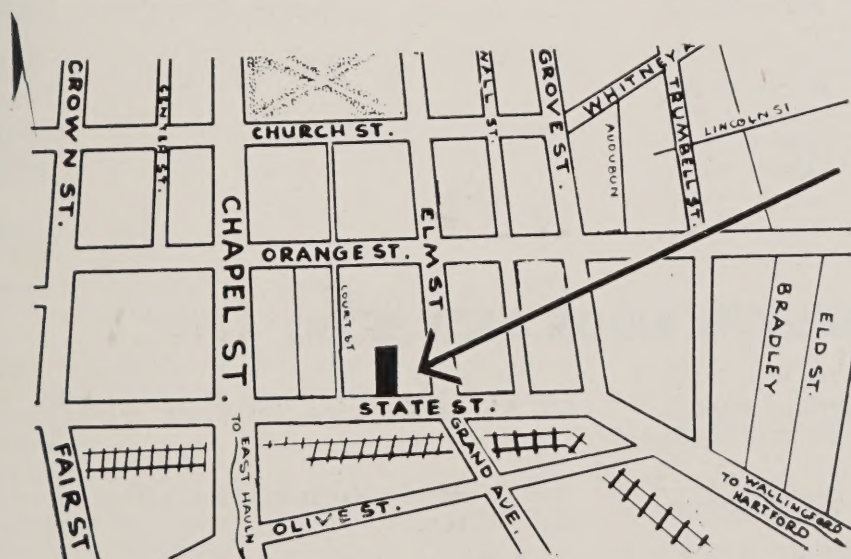

We have considerably increased the size of our pet supply department. You will find it of help to you.

Buildings vanish, but Platt's goes on and on. We are now 78 years old and in a new store on State St., just three doors from the new municipal parking lot located on the site of our old building. In cooperation with the New Haven Chamber of Commerce Parking Plan we offer stamps to help defray your parking expense. Remember too, we offer free delivery service to the New Haven area.

In addition to our State St. store we expect to open a nearby modern garden center in the near future. Watch your papers for the announcement.

With our expanded facilities we hope to be able to be of greater service to you in 1955 than ever before.

A RECOMMENDED FRUIT SPRAY PROGRAM Using a General Purpose Fruit Spray

Spray tree fruits after blossom buds show but before blossoms open.

McIntosh, Cortland and Delicious apples are susceptible to apple scab. These varieties will need at least two sprays before bloom—Do not spray trees in bloom.

Tree fruits should be sprayed as follows:—

1. When most of petals have fallen.
2. One week after No. 1.
3. One week later.

4. Three weeks after No. 3.

5. July 8-12.

6. 10 days later.

7. Aug. 1-7.

Stop spraying on all fruits 1 month before harvest.

A general purpose spray containing neither sulfur nor arsenate of lead can be used on all fruit trees and berry bushes, and in many cases on ornamental shrubs and flowering plants.

Gladiolus Bulbs

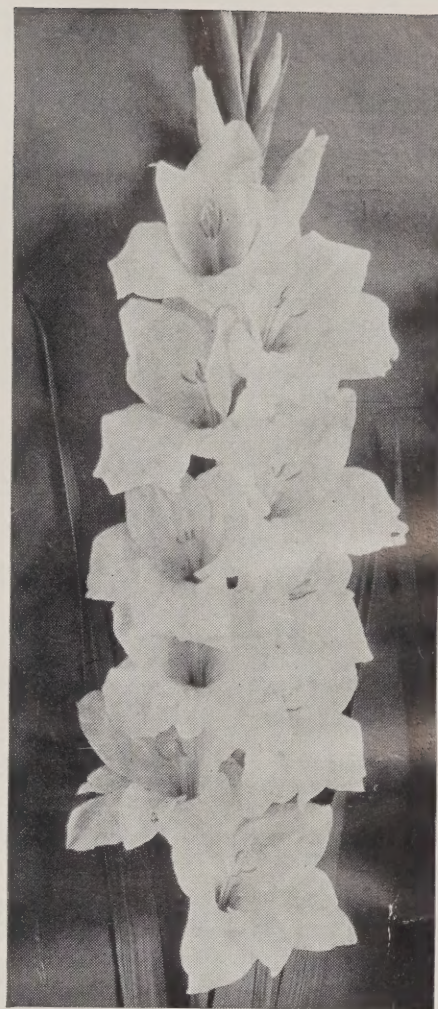

Lovely to plant in beds, borders or groups here and there in annual or perennial plantings. Ideal for house decoration. Cut spikes when the lowest flower shows color, and all the others on the spike clear to the top will open. Plant bulbs every 2 or 3 weeks up to July 1 for a succession of bloom.

DUSTING—The easiest and most efficient means of controlling Thrip is to dust the foliage of the plants with 5% D.D.T. Many types of dusters are available and one can be obtained to suit your size planting. Begin dusting when plants are in third leaf and continue about every two weeks. If this is done you can say goodbye to Thrip!

All Bulbs 2 inches across and up. Guaranteed to please
